

Charting Plus Two-Way Interface with edgeMED's Innovation Practice Management Software

PMS Product Name: Innovation

General Company Contact: edgeMED healthcare solutions, Inc.
1650 South Powerline Road, Suite F
Deerfield Beach, Florida 33442
vc: 800.832.3274 fx: 954.426.8126

Sales Contact: Ryan Kurstin, Regional Sales Director

Technical Contact: Brooks Adair, Lead Software Engineer

Web Address: www.edgemed.com

Interface Used: HL7

Interface Type: Two-way

Trigger Mechanism: Real-Time

Interface Description:

Sends patient demographic data from Innovation to Charting Plus. Receives billing data from Charting Plus into Innovation.

What Fields Transfer:

Patient Demographic Data

- Patient ID and Chart Number
- Patient Name [first, last, middle initial]
- Patient Address [city, state, zip]
- Patient Date of Birth
- Patient Social Security Number
- Patient Race
- Patient Sex
- Patient Phone Number [home and work]
- Primary and Secondary Insurance Carrier
- Referring Physician
- Designated Physician

Billing Data

- Physician First and Last Name
- Location
- Service Date
- CPT-Codes
- CPT Descriptions
- ICD-9 Codes
- ICD-9 Descriptions
- Modifiers
- Number of Units

Scheduling Data

- Physician
- Time
- Location
- Patient Name [first, last, middle initial]
- Chart Number

What Triggers the Data Transfer?

Patient Demographics: Automatic Transfer in Real-Time

Any creation of a patient account, edit to a patient account, or any record that is saved will initiate the transfer into Charting Plus.

Billing Data: Automatic Transfer in Real-Time

Once Billing Data is created and "approved" it will be exported into Innovation.

Scheduling Data: Automatic Transfer in Real-Time

The creation or modification of an appointment will transfer the data into Charting Plus.
